771 The biology of mammalian parenting and its effect on offspring social development *J. K. Rilling and L. J. Young*

776 The evolution of flexible parenting *N. J. Royle et al.*

### ON THE COVER

Babies are produced by contributions from both parents. More and more we are beginning to realize that such contributions go well beyond mere genes, with nurture, environment, and even the parents'

own physiology and experiences shaping offspring and their preparedness for life ahead. See page 742. Photo: © imageBROKER/Alamy
