## COLUMNS & DEPARTMENTS

### 6 EDITOR'S NOTE

#### Studies in Solitude

We take you to Antarctica and enlist your daydreaming, solitary mind.

### 7 INBOX

Readers comment on bee deaths, the FDA's heroine and more.

### 22 VITAL SIGNS

#### One More Thing

With the checkup complete and the doctor headed for the door, a patient blurts out symptoms that could be nothing, or everything.

BY JULIA MICHIE BRUCKNER

### 24 MIND OVER MATTER

#### Lights, Camera, Therapy

Movies are entertainment, a way of escape. But for people with personal challenges, movies also can put problems in perspective. BY AMY KRAFT

### 60 OUT THERE

#### Our Rocks, Ourselves

Nearly 50 years ago, scientists found clues in a meteorite to how planets form. Last September, NASA set course for an asteroid that could reveal even more about the mysteries of the early solar system. BY DOUGLAS FOX

### 9 THE CRUX

A computer scientist unlocks ancient scrolls burned to a crisp; seven may be the lucky number for discovering life outside our solar system; facial expressions might not be as universal as we thought; mice could lose their title as the best lab test subjects; old mold fetches a high price at auction; and more.

Read about the mission of the OSIRIS-REx spacecraft and what we can learn from space rocks on page 60.

### 66 ORIGIN STORY

#### Rock-a-Bye-Baby's Rocky Roots

Lullabies may have evolved in prehistoric times as a way for busy moms to give "hands-free" attention to their children. BY YAO-HUA LAW

### 70 HISTORY LESSONS

#### Treasures Beneath the Ancient Sands

A 2,000-year-old shipwreck off the coast of Greece has offered up artifacts since its discovery a century ago. This summer, excavation resumes. BY MARK BARNA

### 74 20 THINGS YOU DIDN'T KNOW ABOUT ...

#### Swamps

Wetlands aren't just full of mosquitoes and cattails. They also store carbon, act as storm buffers and boast carnivorous plants.

BY GEMMA TARLACH
