Innovation: 3-D models, human cyberconductors

FEATURES

84 | WHOSE MOORS ARE THEY?

Scotland has lost more than 25 percent of its heather moorland since World War II. For what's left of this signature landscape, the future is clouded by debates about class, culture, and nature.

By *Cathy Newman*, Photographs by *Jimi Richardson*

On the Cover Albert Einstein revolutionized our understanding of how the universe works. More than 60 years after his death, we're just beginning to understand how minds like his work. Illustration by *Tamer Hincok*

30 | WHO IS A GENIUS?

Science explores why some exceptional minds soar above mere brilliance.

By *Claudia Kalb*, Photographs by *Paolo Woods*

56 | THE BURNING HEART OF AFRICA

Is failure the fate of the Central African Republic?

By *Peter Gwin*, Photographs by *Marcus Bleasdale*

78 | UNITED IN PROTEST

For indigenous people, rebelling against a pipeline is also uniting nations.

By *Saul Eiben*, Photographs by *Erika Larsen*

112 | FLOWER MEN

In a bustling flower market in Kolkata, India, vendors wear their colorful wares.

Story and Photographs by *Kan Hermann*

120 | AKHENATEN

King Tut's dad, and Egypt's first revolutionary, is still a symbol of change.

By *Peter Hessler*, Photographs by *Rena Effendi*
